Timer

A timer is a tool used to measure time by counting down from a set value or counting up from zero. It is commonly used in cooking, studying, workouts, and online exams. Timers help manage time efficiently and are widely used in apps and websites for tasks like OTP verification and reminders.

Measure tool

A measure tool is used to find the size, distance, or dimensions of an object or space. It helps in measuring length, width, height, area, or angles accurately. It is commonly used in construction, design, and digital tools like Figma or AutoCAD for precise work.

Slider

A slider is a UI component that lets users select a value by moving a handle along a track. It is commonly used for adjusting settings like volume, brightness, price range, or progress. Sliders make input quick, visual, and easy to control in apps and websites.

Users

Users are the people who interact with a product, service, website, or application. In UI/UX and software design, users are the main focus, and their needs, goals, and behavior are studied to create better experiences.
